RISK POLICY

Introduction

Risk management is attempting to identify and then manage threats that could severely impact or bring down the organization. Generally, this involves reviewing operations of the organization, identifying potential threats to the organization and the likelihood of their occurrence, and then taking appropriate actions to address the most likely threats.

Paragraph (C) of sub-clause IV of Clause 49 of the Listing Agreement states as under

> *"The company shall lay down procedures to inform Board members about the risk assessment and minimization procedures. These procedures shall be periodically reviewed to ensure that executive management controls risk through means of a properly defined framework"*

The Ministry of Corporate Affairs, Government of India has also accepted the concept of Risk Management and its relevance to the smooth functioning of the Corporate sector in India and has therefore introduced a specific provision on Risk Management under paragraph (II) (C) of Corporate Governance voluntary guidelines, 2009

(II) (C) Risk Management

i). The Board, its Audit Committee and its executive management should collectively identify the risks impacting the company's business and document their process of risk identification, risk minimization, risk optimization as a part of a risk management policy or strategy.

ii). The Board should also affirm and disclose in its report to members that it has put in place critical risk management framework across the company, which is overseen once every six months by the Board. The disclosure should also include a statement of those elements of risk, that the Board feels, may threaten the existence of the company.

It has therefore become mandatory for the listed Companies to prepare a comprehensive framework of risk management for assessment of risks and determine the responses to these risks so as to minimise their adverse impact on the organisation.

Risk Strategy:

PAL recognizes that risk is an integral and unavoidable component of business and is committed to managing the risk in a proactive and effective manner

The Company believes that the Risk cannot be eliminated. However, it can be:

- Transferred to another party, who is willing to take risk, say by buying an insurance policy or entering into a forward contract;
- Reduced, by having good internal controls;
- Avoided, by not entering into risky businesses;
- Retained, to either avoid the cost of trying to reduce risk or in anticipation of higher profits by taking on more risk, and;
- Shared, by following a middle path between retaining and transferring risk.

PAL is manufacturer of Acrylic Fibre and committed to its excellence.

In today's challenging and competitive environment, strategies for mitigating inherent risks in accomplishing the growth plans of the Company are imperative. The common risks inter alia are: Regulations, competition, Business risk, Technology obsolescence, Investments, retention of talent and expansion of facilities.

Business risk, inter-alia, further includes financial risk, political risk, fidelity risk, legal risk

For managing Risk more efficiently the company would need to identify the risks that it faces in trying to achieve the objectives of the firm. Once these risks are identified, the risk manager would need to evaluate these risks to see which of them will have critical impact on the firm and which of them are not significant enough to deserve further attention.

As a matter of policy, these risks are assessed and steps as appropriate are taken to mitigate the same.

Risk Management Framework

Objectives must exist before management can identify potential events affecting their achievement. Enterprise risk management ensures that management has in place a process to set objectives and that the chosen objectives support and align with the entity's mission and are consistent with its risk appetite.

The Objectives of the Company can be classified into

Strategic:

- Organizational Growth.
- Sustenance and Growth of Strong relationships with dealers/customers.
- Expanding our presence in existing markets and penetrating new geographic markets.
- Continuing to enhance our industry expertise.
- Enhance our capabilities through technology alliances and acquisitions.

Operations:

- Consistent Revenue growth.
- Consistent profitability.
- High quality production.
- Further develop Culture of Innovation.
- Attract and retain quality technical associates and augmenting their training.

Reporting:

- Maintain high standards of Corporate Governance and public disclosure.

Compliance:

- Ensure stricter adherence to policies, procedures and laws/ rules/ regulations/ standards.

In principle, risks always result as consequence of activities or as consequence of non-activities. Risk Management and Risk Monitoring are important in recognizing and controlling risks. The entirety of enterprise risk management is monitored and modifications made as necessary.

Risk mitigation is an exercise aiming to reduce the loss or injury arising out of various risk exposures

PAL adopts systematic approach to mitigate risks associated with accomplishment of objectives, operations, revenues and regulations. The Company believes that this would ensure mitigating steps proactively and help to achieve stated objectives.

There are three key elements which need focus while framing Risk policy.

(1) Risk Assessment
(2) Risk Management
(3) Risk Monitoring.

Risk Assessment

Risks are analyzed, considering likelihood and impact, as a basis for determining how they should be managed.

Risk Assessment consists of a detailed study of threats and vulnerability and resultant exposure to various risks

To meet the stated objectives, effective strategies for exploiting opportunities are to be evolved and as a part of this, key risks are identified and plans for managing the same are laid out.

Risk Management and Risk Monitoring

In the management of Risk the probability of risk assumption is estimated with available data and information and appropriate risk treatments worked out in the following areas:

1. Economic Environment and Market conditions

We are consumer base textile industry and directly related to the basic need of the people and their economic strength.

Strategically, we seek to continuously expand the customer base to maximize the potential sales volumes and at the same time securing additional volumes from existing customers on the basis of our record of satisfactory performance in our earlier dealings. The efforts to enhance quality of products and upgrading their performance parameters are aimed at deriving optimum value from the existing customer base and targeting a larger customer profile. Historically, the strength of our relationships has resulted in significant recurring revenue from existing customers.

To counter pricing pressures caused by strong competition, the Company has been increasing operational efficiency and continued to take initiatives to move up the quality control scale besides cost reduction and cost control initiatives.

2. Fluctuations in Foreign Exchange

While our functional currency is the Indian rupee, we transact a significant portion of our business in USD and accordingly face foreign currency exposure on account of purchases from overseas suppliers in U.S. dollars and are exposed to substantial risk on account of adverse currency movements in global foreign exchange markets.

We manage risk on account of foreign currency fluctuations through limited and short time hedging of transactions with our Bankers. Our risk management strategy is to identify risks we are exposed to, evaluate and measure those risks, decide on managing those risks, regular monitoring and reporting to management. The objective of our risk management policy is to minimize risk arising from adverse currency movements by managing the uncertainty and volatility of foreign exchange fluctuations by hedging the risk to achieve greater predictability and stability.
